# Low Tax, High Reward & High Burn!

---

We know that you are sick of projects with high taxes. This is why we created a contract with **NO** buy taxes and only 12% sell taxes! Additionally, we added a burn mechanism which will burn BITCs after every sell. This way we reduce the supply and control the price to the moon.

**The initial burn is 40%!**

# How To Participate

---

All you have to do is to buy and hold BITC  
You will get the green mined BTCs (BEP20) automatically sent to your wallet.

# Our Miners

We use **Bitmain Antminer S19 Pro+ Hydro**

This Miner

- can produce round about 15\$ at the current BTC price
- consumes hourly round about 4000W

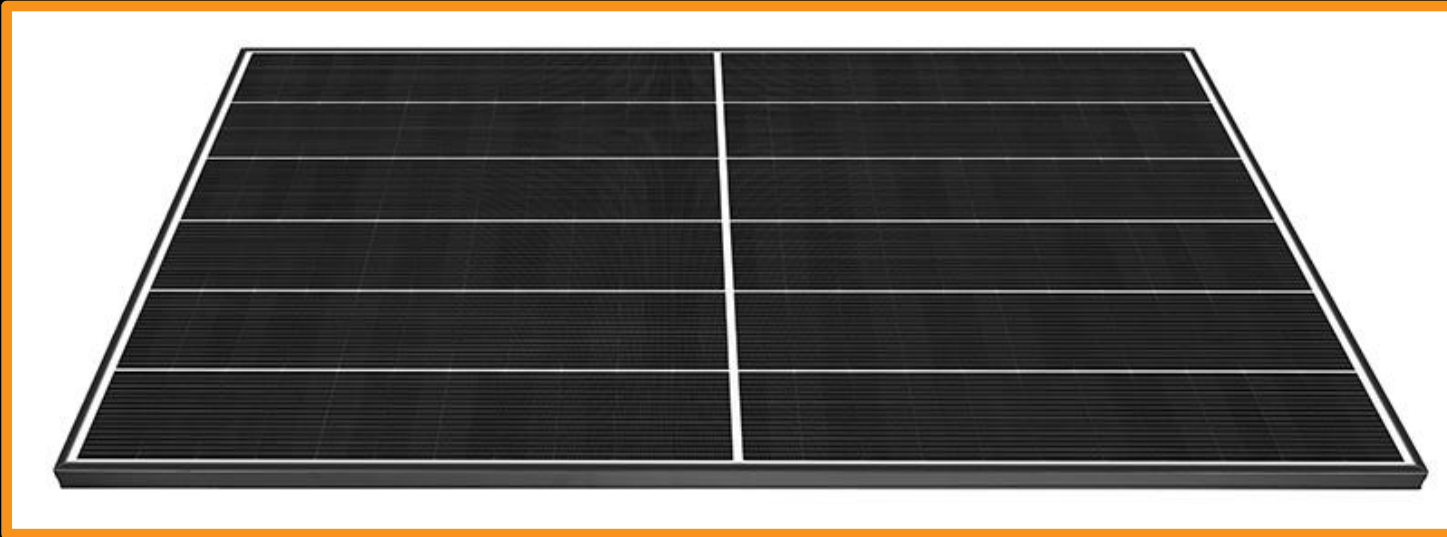

# Our Solar Panels

---

We use **Panasonic EverVolt H**

This Panel

- can produce in average round about 400W hourly
- can deal with 0.1 Miners, which means 10 Panels will provide enough energy for 1 Miner
